Global Affiliates Program

Partnering with Asian organizations to develop internationally experienced global leaders

Program Requirements
We encourage member organizations to nominate representative visiting scholars whose research interests coincide with APARC’s research agenda. Nominations from affiliate organizations are requested by February.

ACTIVE PARTICIPATION
Our Program schedule mirrors the Stanford academic calendar, beginning in September and ending in June. Visiting scholars are required to be in residency during this time and be active participants in both Program and Center activities. To successfully maintain good standing in the Program, regular attendance at designated activities is required. In addition to advancing their own projects, visiting scholars are encouraged to share their experience and knowledge to contribute to the Center.

ENGLISH LANGUAGE
Participants must have adequate command of English to make the most of their experience, as all communication and instruction are conducted in English. An official test score from the Test of English as a Foreign Language (TOEFL), preferably of 89 or higher (or equivalent test), is required for admission. An optional summer 6-week intensive English language training session at Stanford is available for an additional and separate cost to the organization and/or representative.

RESEARCH PROJECT
Each participant designs and conducts a research project throughout the academic year, submits progress summaries and a final report, and gives an oral presentation about the project to the APARC community.

FEE
Organizations affiliated with the Program pay an annual fee that supports Program and Center research and other activities, and that covers basic research and administrative expenses of their representatives.

Become a Global Affiliate
Since its inception in 1982, the Global Affiliates Program at APARC has provided an avenue for Asian organizations across the private and public sectors to benefit from enhanced access to the Stanford community and to the Center’s research on contemporary Asia. When you join the Program, you become part of a worldwide network of leading academics and practitioners committed to addressing critical issues affecting the countries of Asia and their regional and global affairs.

For more information and to discuss a formal affiliation with the Program, please contact:

@APARCGlobalAffiliates
About Us
The Global Affiliates Program at Stanford University’s Shorenstein Asia-Pacific Research Center (APARC) strengthens connections among Asia researchers and Asian leaders from the private and public sectors with mutual interest in furthering U.S.-Asia collaboration. Membership in the Program enables affiliate Asian organizations to nominate designated representatives as visiting scholars at APARC for the duration of one academic year.

Affiliate members engage in the many aspects of research and education at APARC and Stanford at large, and their visiting scholars enrich and inform intellectual exchange in our research community while benefiting from opportunities to hone the skills needed to lead in a globalized world.

Affiliate Benefits
Drawing on Stanford’s strengths and on APARC’s expertise in contemporary Asia-focused, policy-relevant, interdisciplinary research, we are uniquely positioned to help our Asia-based affiliates advance entrepreneurial thinking and a global perspective. The Global Affiliates Program at APARC provides talented personnel with opportunities to do research at Stanford, benefit from Silicon Valley’s culture of innovation, and acquire strong international experience. The Program is a good fit for Asian organizations seeking to cultivate leaders with the mindset and competencies required to address the challenges presented by today’s knowledge economy.

Program Overview
Structured yet flexible, the Global Affiliates Program enables designated representatives from affiliate Asia-based organizations to pursue research and deepen their knowledge of topics of interest and relevance to their work. Nominated representatives are integrated into APARC’s research community as visiting scholars.

The Visiting Scholar Experience
• INTELLECTUAL RIGOR
  Conduct an individual research project on a topic relevant to your work.
• MENTORSHIP
  Work under the direction of an assigned APARC faculty advisor.
• APARC EXPERTISE
  Interact with APARC scholars, participate in Center-wide and Program activities, and benefit from tailored seminars and other learning opportunities.
• THE STANFORD ADVANTAGE
  Audit Stanford courses, engage with Stanford scholars, attend campus events, and use the University’s incredible resources.
• GLOBAL PEER NETWORK
  Connect with peers from different countries and organizations.
• CURATED EXPERIENCES IN SILICON VALLEY
  Learn about the Silicon Valley ecosystem and visit local companies, startups, investment firms, and government institutions.
• SAN FRANCISCO BAY AREA CULTURE
  Explore the array of opportunities the Bay Area offers, including arts, dining, and outdoor activities.
• ALUMNI COMMUNITY ACROSS ASIA
  Join 450+ Global Affiliates Program alumni holding distinguished roles throughout China, Japan, South Korea, and India.

This program helped broaden my views by thinking out-of-the-box and BIG. Attending various events on global issues, technology, and innovation enriched my knowledge and enhanced my analytical thinking.
