

overseas seminars in Seoul, which enable Stanford undergraduates to experience Korean politics, history, and culture firsthand.

In addition, Stanford KSP hosts Korean luncheon seminars, often standing-room-only events at which eminent and emerging scholars present their work. The program organizes a number of workshops and conferences on Korean affairs each year, and the proceedings of these gatherings, as well as other research outcomes, are published as part of Shorenstein APARC's book series with the Brookings Institution Press and Stanford University Press.

SUPPORTING STANFORD KSP

To establish and develop its programs, Stanford KSP has received generous support from Stanford University, alumni, foundations, and friends. Stanford KSP welcomes gifts to continue its work — seeding new research initiatives, funding innovative projects, increasing visibility, and allocating funds to advance research and teaching goals.

To learn more about supporting Stanford KSP, please contact Mr. Neil Penick, Associate Director for Development, FSI, npenick@stanford.edu; or visit <http://ksp.stanford.edu>.

STANFORD KOREAN STUDIES PROGRAM

THE STANFORD KOREAN STUDIES PROGRAM (KSP) WAS FORMALLY ESTABLISHED IN 2001 AT THE WALTER H. SHORENSTEIN ASIA-PACIFIC RESEARCH CENTER (SHORENSTEIN APARC) WITH THE APPOINTMENT OF PROFESSOR GI-WOOK SHIN AS THE FOUNDING DIRECTOR. STANFORD KSP OFFERS COURSES ON KOREA, HOSTS SEMINARS RELATED TO THE STUDY OF KOREA, SPONSORS WORKSHOPS AND CONFERENCES, CONDUCTS RESEARCH PROJECTS, SUPPORTS FELLOWSHIPS, AND COLLABORATES WITH A BROAD RANGE OF VISITING SCHOLARS. STANFORD KSP ALSO WORKS CLOSELY WITH STANFORD'S CENTER FOR EAST ASIAN STUDIES (CEAS), WHICH OFFERS A MASTER'S DEGREE IN EAST ASIAN STUDIES WITH A SPECIALTY IN KOREA.

FREEMAN SPOGLI INSTITUTE
FOR INTERNATIONAL STUDIES

“Since Gi-Wook Shin came to Stanford in 2001, he has developed Stanford KSP into a world-renowned center for contemporary Korean studies. Professor Shin and his colleagues conduct cutting-edge research and publish widely on issues related to the Korean peninsula and U.S.-Korean relations. Stanford KSP is training a new generation of Korea scholars, while working with policy experts in both countries to bridge divides. The presence and participation of distinguished visiting scholars and policymakers further enrich the program. In its second decade, Stanford KSP is poised to expand significantly its global scope and influence.”

COIT D. BLACKER, DIRECTOR, FSI

Stanford KSP focuses on multidisciplinary, social science-oriented, collaborative research on contemporary Korea. In particular, Stanford KSP promotes interdisciplinary research on policy-relevant topics by using the tools and insights of both area studies and the social sciences. Stanford KSP’s mission is to be a research center in the truest sense, with its own research fellows and collaborative projects. It also seeks close collaboration with similar institutions in Korea and elsewhere.

FACULTY AND FELLOWS

Stanford KSP includes faculty, postdoctoral research fellows, predoctoral fellows, Pantech Fellows, Koret Fellows, research assistants, and a program coordinator. A Korean language lecturer and Korean Studies librarian support Stanford KSP activities. In addition, Stanford KSP taps into the array of Stanford-based faculty and senior fellows who conduct policy-related research on Korea, including Michael H. Armacost (Shorenstein APARC),

Larry Diamond (Hoover Institution), Siegfried S. Hecker (CISAC), William J. Perry (FSI), and Henry S. Rowen (Hoover Institution and Shorenstein APARC). The program benefits greatly from the broad experience that these distinguished individuals offer and the real-world perspective they bring to bear on Stanford KSP seminars, conferences, teaching, and publications.

RESEARCH

Stanford KSP sponsors collaborative research projects on a range of Korea-related subjects. The South Korean National Assembly Project considers the generational change under way in South Korea’s government and its political and ideological implications, specifically how such changes will affect Assembly votes—and Korean policy—on major issues. Stanford KSP researchers are also involved in projects on mass media and U.S.-Korea relations. These include the “New Beginnings” policy research initiative and the ROK-U.S. West Coast Strategic Forum,

the Korean experience of historical injustice and reconciliation, and a book series on Korean democratization sponsored by the Academy of Korean Studies. A recently completed project focused on the interplay of global and regional forces in Korea, and on South Koreans’ reassessment of their place in the world order. Findings from these and other groundbreaking projects are regularly presented at Stanford KSP seminars and conferences, and published as books and journal articles.

PROGRAMS

To advance its mission of teaching and training the next generation of scholars, Stanford KSP each year offers a variety of fellowships and hosts visiting scholars from Korea and elsewhere. Fellowships are made possible through generous support from the Pantech Group and the Koret Foundation. Jointly with Stanford’s Center for East Asian Studies, Stanford KSP has initiated a Korea internship program and regularly convenes popular
