

Food and Nutrition Policy Symposium Series

Aquaculture, Food Security and the Marine Environment

**3:30 - 5 p.m. on Thursday, Oct. 27 in Philippines Conference Room, Encina Hall
Reception to follow**

David Little, leads the Sustainable Aquaculture Research group within the Institute of Aquaculture at the University of Stirling in Stirling, Scotland where he

is also a professor of aquatic resources and development. He has over 35 years of experience in tropical aquaculture and his major research interests center around the impacts of aquaculture development on society.

Ronald Hardy is an international expert in fish nutrition and serves as Director of the Aquaculture Research Institute at the University of Idaho. As a veteran of aquaculture

science and fish nutrition for the past 40 years, he has spent the last 25 years conducting research to improve sustainability and reduce environmental impacts of fish feeds used throughout the world.
